LUCKY TRANSPORT SERVICES

App Chalane Ka Aasan Tarika (Roman English Layman Guide)

Daily Operations, Fleet Masters, Trips, GST Invoices & Payments

1. App Ka Maqsad Aur Kaam Karne Ka Tarika

Yeh app Lucky Transport Services ke transport operations aur billing ko aasan aur digital banane ke liye banayi gayi hai. Iske zariye gaadiyan (vehicles), drivers, customers, roz ke trips (challans), diesel kharcha, aur GST tax invoices sab ek jagah manage hote hain.

2. Sabse Zaroori Rule: System Dependency (Kise Pehle Add Karein?)

Transport app me har module ek dusre se juda hua hai. Agar aap galat order me kaam karenge toh error aayega. Niche diya gaya silsila (sequence) hamesha yaad rakhein:

GOLDEN DEPENDENCY SEQUENCE (Kaam Ka Sahi Order)

1. PEHLE: Customer aur Vehicle add karein (warna trip me select nahi hoga).
2. PHIR: Rate Chart me us vehicle ka rate set karein (warna calculation fail hoga).
3. TAB: Trip add karein aur exact time/KM daal kar 'Calculate & review' karein.
4. ZAROORI: Trip ko 'Approve' karein (unapproved trip ka bill nahi ban sakta).
5. INVOICE: Approved trips select karke GST Tax Invoice banayein.
